

COEXPAN and EMSUR exhibit their novel rigid and flexible packaging solutions at FISPAL TECNOLOGÍA, the largest food industry event in Latin America.

- *Packing solutions aimed at satisfying the needs of consumers who are increasingly seeking products with a longer shelf life and practical, sustainable and efficient packaging.*
- *COEXPAN and EMSUR run a number of production facilities in America and Europe, one of which is located in BRAZIL and dedicated to producing integral packaging solutions.*

June 13th, 2019 - COEXPAN and EMSUR, the two main divisions of Grupo Lantero, are displaying their rigid and flexible packaging solutions at the 2019 FISPAL TECNOLOGÍA trade show, the largest event in the Latin American Food and Beverage Industry, which will take place in São Paulo from June 25th to 28th.

Some of the highlights among the products on show at the fair include rigid sheets for FFS machines and thermoformed packaging with mono, medium and high barrier protection. Other significant features are its flexible solutions such as FFS caps, in-mold labeling, laminated films, rotogravure and flexographic HD printing, heat-shrink sleeves, coils for FFS products - a broad portfolio of products with more efficient and sustainable, mono, medium and high barrier packaging solutions, which afford greater protection and longer shelf life for foodstuffs and help to prevent food waste.

More efficient and sustainable packaging solutions focused on the consumer

COEXPAN & EMSUR's developments are designed to meet the needs of consumers and to adapt to new lifestyles by affording greater flexibility, portion control and customization. In the same way, the greater freshness and longer shelf-life standards provided by barrier packaging is having a significant impact on the industry with more active and smart packaging solutions.

At FISPAL TECNOLOGIA, COEXPAN and EMSUR will present new sustainability-focused products, such as containers made from 100% compostable PLA applicable in dairy pots, trays or coffee capsules, as well as other solutions made with recycled post-consumer materials, such as 100% rPET trays suitable for food contact, in line with the fundamental principles of the circular economy or thermoformed packages printed with In Direct Flexo technology that allows for the production of mono-material packaging solutions.

COEXPAN-EMSUR BRAZIL, integral rigid and flexible packaging solutions

COEXPAN-EMSUR runs one production plant in Jundaí, São Paulo covering more than 7,000 sq. meters and equipped with state-of-the-art technology for the production of rigid and flexible packaging solutions, including **PS sheets for Form Fill and Seal (FFS) machines, rotogravure printing for lids and Hot Melt applied banners, and capacity to produce Sleeves.**

COEXPAN and EMSUR will be present on stand K-176 at the 2019 FISPAL TECNOLOGIA trade show. Our team of professionals will be delighted to welcome you and demonstrate our latest rigid and flexible packaging solutions for the food and beverage industry.
